MONTHLY
NEWSLETTER

**Volume No. I**   **Issue No. VII**

We can not forget that organizational success flows from the hearts and minds of the team we lead. Rather than treating the team as we would like to be treated, we should treat them as they would like to be treated.

And that has kept us united every time, more as a family that has members with equal mindsets. This month also we focused more on getting to know each other so that we can underset and the organizational motto, values, and goal.

FROM THE CEO'S DESK

Dear readers,

it is definitely a moment of sheer joy and pride as the 7th Edition of the Newsletter is being conferred to you.

It is a small step accomplished toward the grand vision that we have relentlessly pursued and have worked a day in and day out to establish.

This newsletter is not only a mirror of Utkal Labs as an organization but also a reflection of the mission that we as a team have imbibed, over the days of learning and growing together.

Hope this brings a smile to your face as it takes you back to the lawns of exciting memories when work was fun and learning was exciting.

Happy Reading!

CASE STUDY

Our US-based client wanted to build a B2C service-based project designed to result in profit in the marketplace. The website and app were to offer a home-based service to the consumer who is the end-users of their product and services. The site displays product/service information in the listed format and users/customers can avail of the service through them.

Our team used technologies such as PHP, Laravel, MySQL, React Native, jQuery, AJAX, and Bootstrap UI. To build this unique app for the client.

Project Overview:

This application mainly focuses on selling home-based services directly to the consumer. So, it has mostly 3 user roles. Admin, User who provides the service, and User who consumes those services.
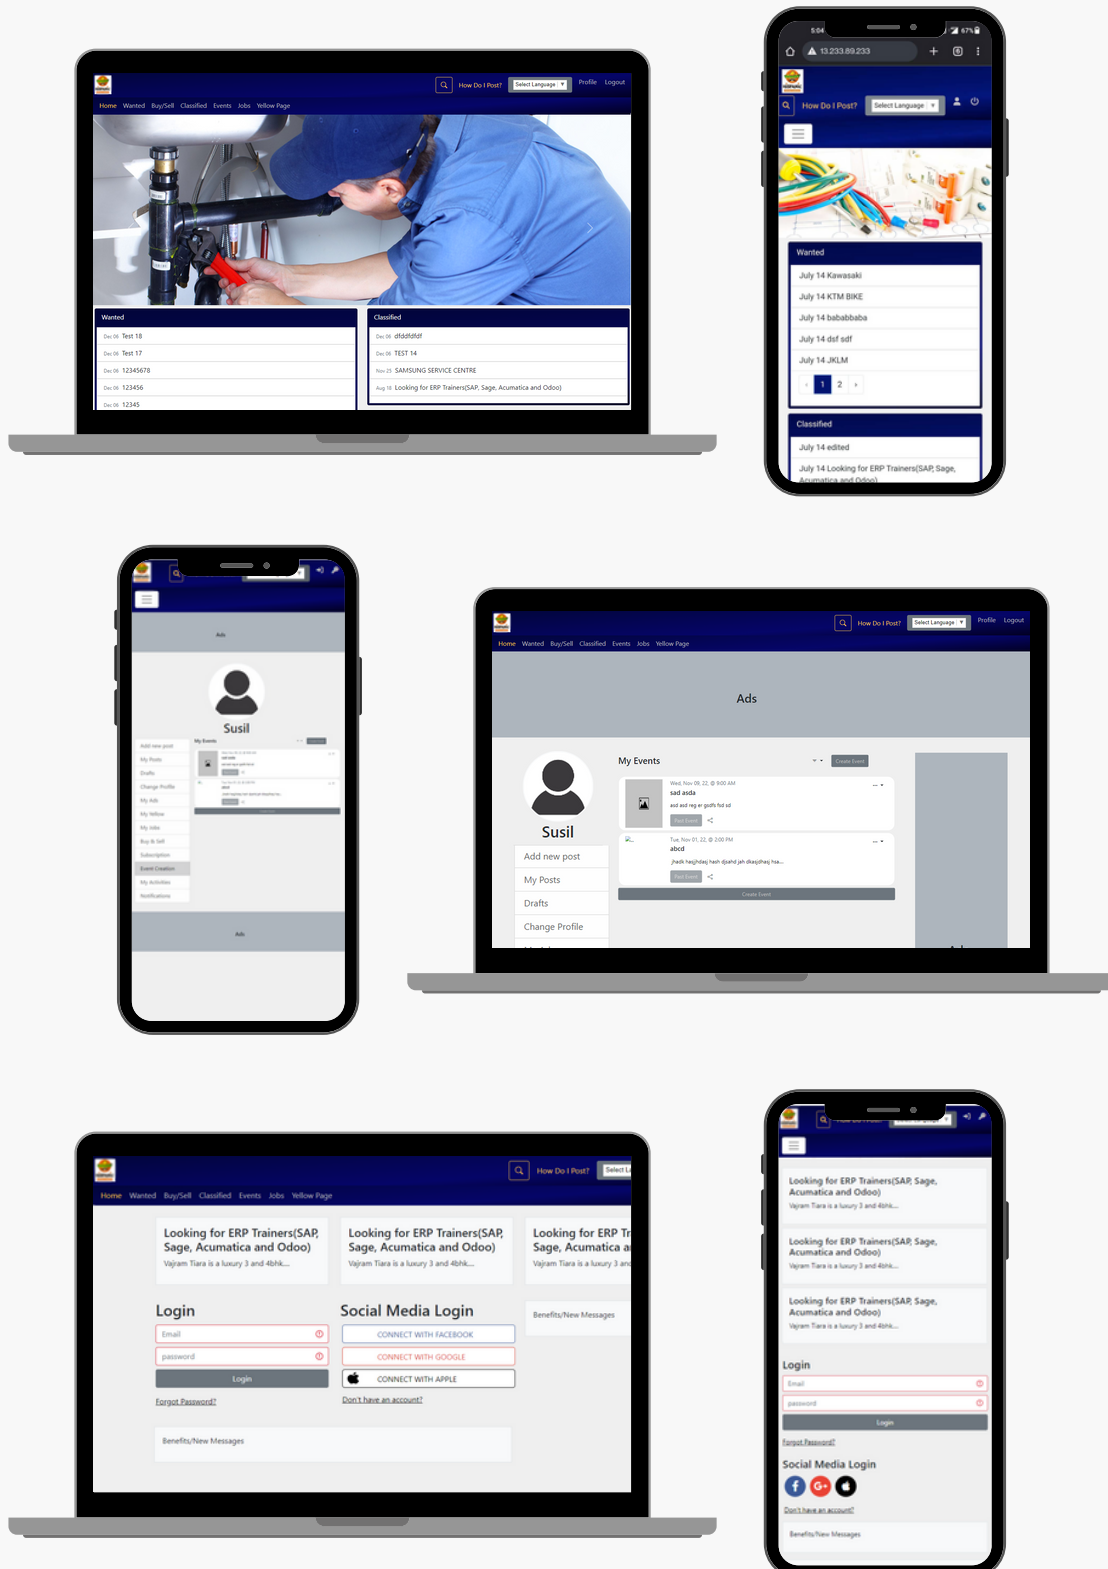

Admin or Super user handles all the default services introduced into the application as well as handles the payment part.

Users who provide the service, list/create paid/free posts into the application as of different pricing standards.

Users who consume those services go through the posts and enroll in the service and pay for the service to the service provider directly. They can participate in different events the service provider lists and enjoy the service after the payment process is done.

This application has 2 parts i.e. web and mobile. The mobile app has been made for both Android and iOS where the features and designs are in sync with the web. The web has been designed in a responsive way, where one can access the application in a mobile browser.

GET TOGETHER

Building a great team needs a lot of collaboration, interaction, symphony, and communication. In today's world, where our world has shrunk to our laptop screens, it is essential for an organization like ours, which offers remote work type, to conduct frequent outings or get together to bring harmony and integrity amongst the team members.

This month, such an endeavor was successfully carried out when we collectively decided to organize a lunch party at one of our team members places. Nevertheless, to say, the enthusiasm and the joy that we shared made it more memorable.

MEN'S DAY CELEBRATION

They are the compass that has always guided us at times and morrows. They inspire us to reach greater heights, and never fail to comfort us when we falter and fail.

They always encourage us to step out of our comfort zone and strive for our dreams. With such a massive contribution to society, they are barely acknowledged and appreciated.

To show our heartfelt gratitude to the men of our organization, we conducted a virtual get-together for them and expressed our feelings for them. We let them know that they are valued more than words can express.

PEOPLE'S CORNER

A brief experience of the celebration of Men's day

Dear all male.......
Pata nahi.. Gender wala tag ka rule kyun banaya, Or mardo ka Muchh wala dag,
kyun uthana padta hai, ye bhari bharkam bojh, puchhne se pahle usee,,
Ek bar uske jagh le kar to dekh....

Are bus, car, gun k khilone se mat bandhoo jab ladka bachha ho,
use bhi to gudiya main man hoga,,
Ek bar uske jagah le kar to dekho...

Jaldi badhe hone k bojh k nichhe, jimmedariyo ka pitra bhi kab badhte jate hai,
Dil unka bhi 300gm ka hota hai, uske upar lohe ka social cover chhada hota hai,,
Ek bar uske jagah le kar to dekh...

Tum chhaho doctor banno, engineers ya byparr Karo, Bas 25 tak atte atte apne carrier ko sakar karo,
fir Shadii, Bacche, Ghar pariwar chalana hai. Kab tak ladakpan masoom chalega, ye gf bf chakkar se
bahar bhi to aana hai.. Biwi Job ya Housewife banegi ye uska Apni feshla hai...tujhe to apni ghar chalana hai,,
Ek bar koi tere jagha le kar to dekhe...

Kabhi Maa, ka tane se Biwi ka dildukhta hai, to Kabhi biwi ki karnamo se maa ka kaleja Fata hai,
Kabhi Maa Sahi hoti hai, Biwi nahii, par hamesha biwi galat jarruri to nahi.
EK Ka dil ka tukda hai to ek ka mang ka sindoor hai. Bas tu chakki jesse do hissao main batt jata hai..
Ek bar koi tere jagha lekker to dekhe...

Budha maa bap ki jimmedariyo ke sathh, bachho ke sapno ka pitra leke tu chalta hai har roz.
kon samjhe ye, kese batayega har din bhar ke thakan se chaknna chhur hai tu..
Ek bar koi tere jagha koi leke to dekhe...

Jane kyun kismat se juhj kar rahata hai tu, khud ko kaskar roz, yadd nahi hoga tujhe bhi kis din roya tha tu...
Ek bar koi tere jagha koi leke to dekhe....

Jakad Liya hai mardo wale zangir, Inke pahachan, kitne balban, kitne Shaan, kitne tankha..
Dil main jhakho kabhi unke,**To chhaye ye bhi apne udan...**

Inke Bari jab aaye kyun kar jate hai sabhi bye, Chhal chhod ye batte,
nahi na man tu itni jaldi harr... A aaj hai moka unko bhi to special karwa yaar...
Utha tu uska thod nakhre, uske sapno ka banja hissa...
Ho tum dono ek jese...Bas khattam kar ye Gender wala tag kissa....
